Aemcolo

Description

Aemcolo (rifamycin)

Background

Aemcolo belongs to the ansamycin class of antibacterial drugs and acts by inhibiting the betasubunit of the bacterial DNA-dependent RNA polymerase, blocking one of the steps in DNA transcription. Aemcolo is used for the treatment of travelers' diarrhea (TD) caused by noninvasive strains of *Escherichia coli* (*E.coli*) in adults (1).

Regulatory Status

FDA-approved indication: Aemcolo is a rifamycin antibacterial indicated for the treatment of travelers' diarrhea (TD) caused by noninvasive strains of *Escherichia coli* in adults (1).

Limitations of Use:

Aemcolo is not indicated in patients with diarrhea complicated by fever and/or bloody stool or due to pathogens other than noninvasive strains of *E. coli* (1).

To reduce the development of drug-resistant bacteria and maintain the effectiveness of Aemcolo and other antibacterial drugs, Aemcolo should be used only to treat or prevent infections that are proven or strongly suspected to be caused by bacteria (1).

The safety and effectiveness of Aemcolo in pediatric patients less than 18 years of age have not been established (1).

Policy

This policy statement applies to clinical review performed for pre-service (Prior Approval, Precertification, Advanced Benefit Determination, etc.) and/or post-service claims.

Aemcolo may be considered **medically necessary** if the conditions indicated below are met.

Aemcolo may be considered investigational for all other indications.

Prior-Approval Requirements

Age 18 years of age or older

Diagnosis

Patient must have the following:

- 1. Travelers' diarrhea caused by noninvasive strains of Escherichia coli
 - a. Patient does **NOT** have a fever > 38 degrees C (100.4 degrees F)
 - b. NO bloody stools or signs of systemic illness
 - **c. NO** dual therapy with another Prior Authorization (PA) medication for Travelers' diarrhea (see Appendix 1)

Prior – Approval Renewal Requirements

Same as above

Policy Guidelines

Pre - PA Allowance

Age	18 years of age or older
Quantity	12 tablets per 365 days

Prior - Approval Limits

Section:	Prescription Drugs	Effective Date:	April 1, 2025
Subsection:	Anti-Infective Agents	Original Policy Date:	January 25, 2019
Subject:	Aemcolo	Page:	3 of 5

Quantity	12 tablets per 90 days
Duration	3 months

Prior – Approval Renewal Limits

Same as above

Rationale

Summary

Aemcolo belongs to the ansamycin class of antibacterial drugs and acts by inhibiting the betasubunit of the bacterial DNA-dependent RNA polymerase, blocking one of the steps in DNA transcription. Aemcolo is used for the treatment of travelers' diarrhea (TD) caused by noninvasive strains of *Escherichia coli* (*E.coli*) in adults. The safety and effectiveness of Aemcolo in pediatric patients less than 18 years of age have not been established (1).

Prior approval is required to ensure the safe, clinically appropriate, and cost-effective use of Aemcolo while maintaining optimal therapeutic outcomes.
