Cinqair

Description

Cinqair (reslizumab)

Background

Cinqair (reslizumab) is an interleukin-5 antagonist (IgG4 kappa). IL-5 is the major cytokine responsible for the growth and differentiation, recruitment, activation, and survival of eosinophils (a cell type associated with inflammation and an important component in the pathogenesis of asthma). Cinqair, by inhibiting IL-5 signaling, reduces the production and survival of eosinophils; however, the mechanism of Cinqair action in asthma has not been definitively established (1).

Regulatory Status

FDA-approved indication: Cinqair is an interleukin-5 antagonist monoclonal antibody (IgG4 kappa) indicated for add-on maintenance treatment of patients with severe asthma aged 18 years and older, and with an eosinophilic phenotype (2).

Limitations of Use: (2)

- 1. Cinqair is not indicated for treatment of other eosinophilic conditions
- 2. Cinqair is not indicated for relief of acute bronchospasm or status asthmaticus

Cinqair has a boxed warning for anaphylaxis. Patients should be observed for an appropriate period of time after Cinqair administration by a healthcare professional prepared to manage anaphylaxis. Discontinue Cinqair immediately if the patient experiences signs or symptoms of anaphylaxis (2).

Section: Prescription Drugs Effective Date: April 1, 2025

Subsection: Respiratory Agents Original Policy Date: April 22, 2016

Subject: Cinqair Page: 2 of 6

FEP adherence is defined as ≥50% utilization within the last 180 days.

The safety and effectiveness of Cinqair in pediatric patients less than 18 years of age have not been established (2).

Policy

This policy statement applies to clinical review performed for pre-service (Prior Approval, Precertification, Advanced Benefit Determination, etc.) and/or post-service claims.

Cinquir may be considered **medically necessary** if the conditions indicated below are met.

Cinquir may be considered **investigational** for all other indications.

Prior-Approval Requirements

Age 18 years of age or older

Diagnosis

Patient must have the following **AND** submission of medical records (e.g., chart notes, laboratory values) documenting the following:

Severe Asthma with an eosinophilic phenotype

AND ALL of the following:

- 1. Eosinophil count greater than or equal to 150 cells/mcL in the past 90 days **OR** greater than or equal to 300 cells/mcL in the past 12 months
- Inadequate control of asthma symptoms after a minimum of 3 months of compliant use with greater than or equal to 50% adherence with ONE of the following within the past 6 months:
 - a. Inhaled corticosteroids & long acting beta₂ agonist
 - b. Inhaled corticosteroids & long acting muscarinic antagonist
- Only administered by a healthcare professional with appropriate medical support to manage anaphylaxis and monitored for an appropriate period of time after infusion

Section:Prescription DrugsEffective Date:April 1, 2025Subsection:Respiratory AgentsOriginal Policy Date:April 22, 2016

Subject: Cinqair Page: 3 of 6

4. **NOT** used for the relief of acute bronchospasm or status asthmaticus

5. **NO** dual therapy with another monoclonal antibody for the treatment of asthma or COPD (see Appendix 1)

All approved requests are subject to review by a clinical specialist for final validation and coverage determination once all required documentation has been received. Current utilization, including samples, does not guarantee approval of coverage.

Prior - Approval Renewal Requirements

Age 18 years of age or older

Diagnosis

Patient must have the following **AND** submission of medical records (e.g., chart notes, laboratory values) documenting the following:

Asthma with an eosinophilic phenotype

AND ALL of the following:

- 1. Decreased exacerbations **OR** improvement in symptoms
- 2. Decreased utilization of rescue medications
- 3. Patient has been compliant on Cingair therapy
- 4. NOT used for the relief of acute bronchospasm or status asthmaticus
- 5. **NO** dual therapy with another monoclonal antibody for the treatment of asthma or COPD (see Appendix 1)

All approved requests are subject to review by a clinical specialist for final validation and coverage determination once all required documentation has been received. Current utilization, including samples, does not guarantee approval of coverage.

Rationale

Summary

Cinqair (reslizumab) is an interleukin-5 antagonist monoclonal antibody (IgG4 kappa) indicated for add-on maintenance treatment of adult patients with severe asthma with an eosinophilic phenotype. Cinqair has a boxed warning for anaphylaxis. Patients should be observed for an appropriate period of time after Cinqair administration by a healthcare professional prepared to manage anaphylaxis. The safety and effectiveness of Cinqair in pediatric patients less than 18 years of age have not been established (2).

Prior authorization is required to ensure the safe, clinically appropriate, and cost-effective use of Cinqair while maintaining optimal therapeutic outcomes.

June 2018 Annual editorial review

Addition of requirement for asthma: Inadequate control of asthmatic symptoms after a minimum of 3 months of ONE of the following: Inhaled corticosteroids & long acting beta₂ agonist or Inhaled corticosteroids & long

acting muscarinic antagonist

March 2019 Annual review

August 2019 Addition of the 50% adherence requirement. Removed requirement to use

in combination with IBS + LABA and addition of renewal requirement to be

compliant on therapy. Addition to managed PA program

September 2019 Annual review and reference update

March 2020 Annual review

March 2021 Annual review and reference update

May 2021 Revision of eosinophil count requirement from 400 cells/mcL in the last 30

days to 150 cells/mcL in the last 90 days or 300 cells/mcL in the last 12 months to align with GINA guidelines. Removal of "Severe" from renewal

diagnosis.

June 2021 Annual review
March 2022 Annual review
June 2022 Annual review
September 2022 Annual review
March 2023 Annual review

December 2023 Annual review. Per SME, changed renewal requirement to decreased

exacerbations or improvement in symptoms

March 2024 Annual review

December 2024 Annual editorial review. Added Appendix 1. Per SME, rewrote exclusion

requirements to remove separate section and removed requirement that

Cingair is not for the treatment of another eosinophilic condition

March 2025 Annual review
